Network Infrastructure & Peripherals

Active Directory

ASDF designs, implements, maintains and secures Microsoft Windows 2000/2003 Active directory implementations. Our professionals have an in depth understanding of Microsoft’s Group Policies which results in superior network control greatly reducing administrative overhead.

Migrations

ASDF performs smooth and seamless migrations of all legacy Microsoft products which includes Windows NT4.0, Exchange 5.5/2000, SQL 6.5/7.0 as well as Non Microsoft based messaging systems such as Lotus Notes and Novell GroupWise.

Consolidation

With new technology such as virtual servers, more intelligently designed applications and automation, Server rooms with multitudes of servers can be consolidated into fewer Servers in the Server room reducing power, hardware and administrative costs.

Desktops

Deployment and imaging technologies provide you with an inexpensive and automated way to deploy your desktops. This greatly reduces costs in administrative overhead. Login scripts and various other applications such as Microsoft SMS provide streamlined desktop administration efficiency producing unparalleled administrative savings.

E-Mail

ASDF provides comprehensive messaging solutions of all kinds ranging from startups to enterprise level. This includes messaging systems designed to meet all compliance standards. ASDF can provide many varying levels of mobile messaging solutions making communication

Backup

ASDF provides all forms of backup solutions which includes backup to tape, disk and offline. The backup process is completely automated included a centralized log file location as well as various forms of backup job notification. This ensures that backups seldom require intervention. ASDF performs routine restore tests.

AntiVirus/AntiSpam

ASDF provides complete protection and preventation against the worst types of viruses, Trojans, phishing and spam techniques. These solutions are customized according to your needs, whether it be implemented onsite for greater control and granularity or outsourced to ASDF for complete reassurance and reduced administrative overhead. Prevention is better than cure!

Remote Access

ASDF provides secure and simple two click solutions to gain remote access to your office network from anywhere in the world. This includes secure remote access to all files, e-mails and office applications that one would find in the office. Don’t let the boundaries of your office limit your business’ capabilities.

Wireless

Let ASDF take care of your wireless needs to ensure your complete freedom to operate without boundaries within your office.

Telecommunication

ASDF can provide you with the latest in voice communication products that range from wired to wireless. We can design, implement and/or maintain your PBX infrastructure whether it be proprietary equipment or allow ASDF to provide you with a PBX solution that best fits your business needs. ASDF can also provide a great range of Cellphone/PDA devices at extremely competitive rates.

Documentation

Knowledge is a company’s greatest asset. Let ASDF provide you with an excellent framework to secure this knowledge. More often that not important technical information and processes go undocumented exposing a potential loss of knowledge. ASDF can quickly identify your key technical areas and ensure that all documentation is available and that a process is implemented to ensure timely updates. ASDF can provide this documentation or work with existing staff members to provide it. Secure your companies knowledge and document!
